IAS WITH DR RAVI
AIM. PREPARE. ACHIEVE

APPSC Daily Current Affairs

24 October 2026 | English and Telugu

Inside this edition

Oil India's KG Basin gas discovery: the correct block, appraisal well, test flow versus peak flow, and energy-policy relevance.

AP thermal-power background: plant ownership, installed capacity and the difference between coal stock and monthly stocking norms.

One revision point

A discovery is not commercial production. An appraisal test's maximum gas-flow rate is not a confirmed sustained production rate.

గుర్తించిన వనరు వెంటనే వాణిజ్య ఉత్పత్తి అయినట్లు కాదు. పరీక్షలో వచ్చిన గరిష్ఠ వాయువు ప్రవాహం నిరంతర ఉత్పత్తి రేటుతో సమానం కాదు.

Preview only
